

Aaditya Bilakanti

Sohomore, Phillips Exeter Academy, Exeter, NH

Autobiography:

Hi! My name is Aaditya Bilakanti and I'm a sophomore at Phillips Exeter Academy. I got interested in AI first when I saw a model that could recognize handwritten digits. I played around the tool and became more interested in Machine Learning, and improved my math knowledge to understand it better. Last year, I decided to apply my knowledge to USAAIO, which further improved my knowledge and solidified my understanding in AI.

Besides AI, I like pure mathematics and compete in various STEM competitions. When I'm not on my laptop, I'm a fan of the Dallas Cowboys and an avid reader of the Percy Jackson series.
