

Sanghyeon (Robert) Joo

Rising senior, Phillips Exeter Academy, Exeter, NH

Autobiography:

Hi! I'm Robert Joo, a rising senior at Phillips Exeter Academy in New Hampshire, originally from Seoul, South Korea. I first became interested in AI when ChatGPT 3.5 first launched and quickly found myself playing around with the tool quite often. Last year, I decided to dig deeper into the world of machine learning, building several projects and honing my skills, eventually competing in AIO to practice and expand upon my knowledge of Machine Learning.

Outside of AI, I like to explore math and physics, tackle various STEM competitions, and work on research. When I'm not coding or studying, I unwind with a good book or a game of chess. I'm thrilled by the rapid advances in Artificial Intelligence and am eager to see the singularity take off!
