

Jerry Zhang

Rising senior, South Pasadena High School, South Pasadena, CA

Autobiography:

Hi, I'm Jerry. I'm a kid interested in math and artificial intelligence. Currently, I work on small robotics projects and open combinatorics problems in my free time. My favorite AI topic is representation learning (e.g. contrastive learning and world models). I strongly believe in developing intelligence frameworks which are grounded in mathematical rigor and clarity. My dream is to build intelligent robots capable of thinking, feeling, and living the same way we do. Aside from thinking about AI, I run cross country for the school team, and I also write poetry occasionally. I am deeply honored to compete in IOAI for Team USA this year. Thank you!
