

Shengdao Ke

Senior, Phillips Academy Andover, Andover, MA

Autobiography:

Hi! I'm Shengdao (Bill) Ke, a senior at Phillips Academy in Massachusetts. Though I've been coding since primary school, my first exposure to AI was in the extremely early stages of public image-generation models, when I tried playing around with DALL-E (now GPT Image). Ever since then, I've been looking into both the theory and practical applications of AI, especially how agents simulate or even (debatably) possess cognitive abilities.

Outside of AI, I enjoy doing math, drawing, and playing ultimate frisbee. I'm looking forward to competing for Team USA at the IAIO and meeting like-minded, passionate people.
